Audits that drive action, not just checkboxes.

Digital checklists for process audits, 5S, safety walks, and compliance. Every finding stays on record instead of in a filing cabinet.

Paper audits created paper piles

Clipboards full of checkmarks went into a filing cabinet. Nobody reviewed them, nobody trended them. When an auditor found something wrong, it got noted on paper and promptly forgotten.

Now findings drive action

TeamGuru turns your audits into digital checklists that come back on schedule. Every round is saved with its date, so each finding stays on record instead of in a drawer.

- **Every finding on record**
- **Your own templates for 5S, LPA or safety walks**
- **Audits from a phone or tablet**
- **A fresh checklist every round**

What you get

Checklists on a schedule

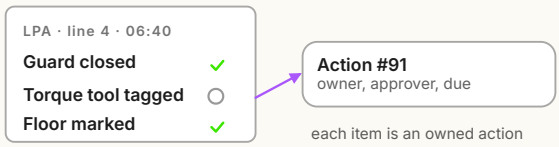

Set how often a checklist runs: daily on the weekdays you pick, weekly, monthly or yearly. When the time comes, a fresh copy with the current date is ready for the next round.

checklist	how often	next round
LPA team leader	Mon to Fri	today 14:00
5S line 4	weekly	Thu
Safety walk	monthly	3 Nov

a fresh copy with today's date, ready for the next round

Checklists built your way

Build your own templates for 5S rounds, layered audits or safety walks. Every item is an action with an owner, an approver and a due date.

each item is an owned action

Every round on record

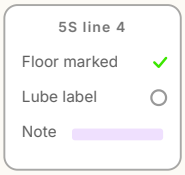

Each round is its own dated copy. Last month's audit sits next to today's, so you can see what was found and when.

every round stays on record

Audits on the shop floor

Auditors open the checklist in the browser of a phone or tablet, right where the work happens. Nothing to install.
